

Creating Green Eco-Friendly Pot Hole Repair Solutions

AN EASY AND ECONOMICAL POTHOLE REPAIR SYSTEM FOR ROAD PAVEMENTS

PotHoleGlue has been specifically formulated to create a powerful, durable, easy to apply system for the economical repair of potholes in bitumen and concrete road pavements. PotHoleGlue is a new alternative to conventional, more harmful, less effective methods of road repair.

EXCEPTIONAL RESULTS

PotHoleGlue gives a tough, durable, long lasting pothole repair that creates an exceptionally strong bond between the applied aggregate and the surrounding pavement. PotHoleGlue has a quick curing time and is not harmful to people or the environment. PotHoleGlue has exceptional chemical, thermal and UV stability making it a permanent fix. It creates a bonded seal to the existing pavement preventing water penetration and further erosion.

USES AND BENEFITS OF POTHOLEGLUE

- High UV stability making it long lasting
 - Reduced water absorbtion <5%
 - Non-hazardous and non-toxic
- Ideal for use in environmentally sensitive areas
 - Can be applied with basic hand tools
 - Economical and easy to apply
- No wasting of materials like traditional methods
- Ideal for repairing bitumen and concrete pavements
